1) Other changes consist of revaluations due to price and exchange rate changes as well as statistical reclassifications.

2) Annual percentage changes are calculated on the basis of transactions.

3) The breakdown by investment policy is generally based on the types of asset in which the investment funds primarily invest, usually on the basis of a stated strategy (e.g. if the fund invests primarily in shares and other equity, it is allocated to the "equity funds" category). Funds investing in both equity and bonds, without any prevalent policy for either, are allocated to the "mixed funds" category. Hedge funds are classified in line with the statistical definition set out in Guideline ECB/2007/9. In particular, they cover funds with relatively unconstrained investment strategies and few restrictions on the types of financial asset in which they may invest. If a fund cannot be classified as an equity, bond, mixed, real estate or hedge fund, it is included in the residual "other funds" category.

4) The shares/units of open-end funds can be redeemed out of the fund's assets. Closed-end funds are funds with a fixed number of issued shares/units.
